

WELCOME TO OUR CARPET WASHING BUYERS GUIDE

Here you will find everything you need to know about cleaning and removing stains from your carpets and what type of carpet washer might be right for you.

WHY USE A CARPET WASHER?

Carpet cleaning isn't just about the build up of dirt, or occasional spills and stains that you can clearly see. It's also about the dirt you can't. What the eye can't see, a carpet washer will!

When your carpets start to look dirty, dull or stained, you need more than just a regular vacuum cleaner to bring them back to life. Using even the most powerful vacuum cleaner isn't enough to remove hidden dirt and debris that lives deep within your carpets and rugs to leave them looking and smelling clean.

DUST MITES AND ALLERGENS LIVE AND MULTIPLY IN CARPETS AND ARE THE MAIN TRIGGER OF ALLERGIES

Carpets also provide a warm home for dust mites and allergens to live and multiply. They can be found in your carpets and are the main triggers of allergies such as asthma and hay fever, so in order to keep your home hygienic and clean, it's important to regularly wash your carpets.

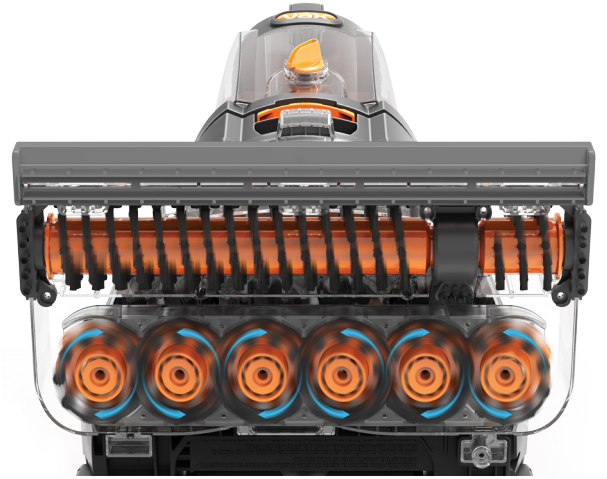

Using a Vax carpet washer will make your carpets, rugs and upholstery look and feel like new, not to mention smell great! No job is too big or too small and your carpets will be dry in no time. They're the perfect addition to every household.

IT'S NOT JUST ABOUT THE DIRT YOU CAN SEE. IT'S ALSO ABOUT THE DIRT YOU CANT!

HOW DO THEY WORK?

WARM WATER + SOLUTION + POWERFUL BRUSHES = DEEP EMBEDDED DIRT REMOVAL

The combination of warm water, specially-formulated solution and dirt-loosening rotating/SpinScrub brushes help breakdown and power through dirt. The powerful extraction then sucks the dirt and excess liquid from the carpet into the dirty water tank, leaving your carpets clean and fresh.

You'll be amazed at how dirty the water is! (You should vacuum your carpets thoroughly before using a carpet washer as this will prevent any excess hair or dust being caught in the brushes.)

WHAT FEATURES DO I NEED?

There are several features worth considering when buying a carpet washer. Would you like it to also clean surfaces above the floor? If so, there's a variety of Vax carpet washers that have a hose and brush attachments that can easily clean upholstery, stairs, car interiors whilst tackling spots and stains.

Brushes

The brushes on a carpet washer are an important feature as they penetrate and agitate deep into the carpet pile to remove dirt.

- **A rotating brush** will give your carpets a great clean.
- **Dual rotating brushes** are perfect for a thorough clean throughout your home.
- **SpinScrub brushes** are a Vax patented technology that's designed to create a scrubbing action to clean every angle of your carpet fibres for a deep clean.
- **SpinScrub + rotating brushes** incorporates the Vax DualTECH™ cleaning system for an extra deep clean

If you want a carpet washer for frequent use in a relatively quiet household then a model with rotating brushes is ideal. If you live in a busy household with children and pets, one of our advanced models with SpinScrub and rotating brushes can tackle those tough jobs.

YOU ONLY HAVE TO WAIT A FEW HOURS FOR YOUR CARPETS TO DRY WITH A VAX CARPET WASHER

You don't have to wait long for your carpets to dry and with a Vax carpet washer you'll only have to wait a few hours. Carpet washers can have your carpets clean, dry and back in action in just a couple of hours. Dual V technology also helps your carpets dry quicker. It consists of even channels of suction across the floor head to ensure even more moisture is extracted from your carpets.

Several carpet washers also offer heated cleaning systems, which blow hot air onto the carpet to speed up the drying process even further.

HOW MUCH SHOULD I SPEND?

This really depends on what type of carpet washer you want and how you plan to use it. Buying a carpet washer can really save you money over time and work out cheaper than renting (and of course replacing your carpets!)

Vax offer a wide range of washers suitable for every home and requirement. If you live in a small home and want to clean carpets regularly then one of our Dual Power range may suit as they are light and compact. If you have a larger property and are more likely to do a thorough clean regularly, you may want a machine with a larger capacity and our most advanced brush technology.

Also, if you want to use it for cleaning your hard floor, upholstery or stairs too, it's worth investing in a machine that offers these additional features.

You'll probably find that all your friends and family will want to use your machine once they see the results, so it really does work out as a great investment for all the family!

WHY VAX?

Vax know everything there is to know about cleaning carpets. We have a heritage of over 37 years with our carpet washers being designed in the UK from people who live and breathe carpet washing. Our machines are designed with you, your home and family in mind for great results without the hassle.

FAQs

Can I use a carpet washer on wool carpets?

All Vax carpet cleaners when used with our Vax-formulated, WoolSafe approved solutions are safe to use on wool carpets.

Can you use a carpet washer as an ordinary vacuum cleaner?

Upright carpet cleaners cannot be used as a vacuum cleaner, however we have multifunctional wet and dry carpet cleaners that can be used as both.

Can you use other carpet solution instead of Vax?

We advise only using Vax solution as it's specially formulated to not only to leave your carpets and rugs looking new but smelling great as well. Vax solutions are also tested to ensure your machine remains performing to its optimum.

Can a carpet washer be used to suck up water?

Vax carpet washers can be used to suck up excess water and if you have any leaks. Some hard floor models can also suck spills from hard floors.

How often should I clean my carpets?

As often as you think it's needed. It can be used to tackle high traffic areas where pets lay, for deep spot stains and spills, or to give all your carpets a thorough clean. Most of our customers tell us they deep clean a few times a year, but this really depends on your home environment. Using a carpet washer frequently will keep your carpets looking and smelling like new all year round!

Do you get solution with the carpet washer?

All Vax carpet washers come with enough solution to get you started so you can clean 2 standard size rooms. We offer a wide range of fragrances and formulas perfect for any home.
